SEMINAR FOR MASTER STUDENTS

WAS HABE ICH AUSPROBIERT?

In the seminar each student has his/her own topic which he/she presents, after which a discussion takes place. Especially in the digital format it is sometimes difficult to get the discussion going.

WAS HABE ICH GETAN?

Apart from each student giving their presentation, they are also 'chair' for the next talk. The role of chair is to (in a nice and personal way) introduce the presenter and also to moderate the discussion afterwards.

MIT WELCHEM ERFOLG?

The start of the discussion is much easier and since the different students know each other they were also able to give a nice introduction to the next presenter. On top of that, everyone is at least once 'moderator' so in this way also everyone has to at least ask a question once.

WELCHE HINDERNISSE GIBT ES
ZU BEACHTEN?

No specific drawbacks
